AMENDMENTS TO THE ABSTRACT
(REPLACEMENT ABSTRACT)

Please replace the abstract of the subject application with the following text:

ELEVATING TOILET SEAT WITH LID OPENING MECHANISM

B² A height adjustable toilet seat apparatus for disabled users includes a toilet seat having a hinged lid. The apparatus may be fixed to a toilet bowl or to a wheelchair and includes telescopic legs for supporting the toilet seat and lid at different heights. A lid opening mechanism is operated by a foot lever slidably connected to at least one of said legs. A catch is biased to a holding position for holding the lid in a rotated attitude and a foot peddle and handle are provided to release the catch.
